Meeting Notes

Designer: Eugenia Yoh
Creative Director: Lucy Chen

- consider the responsive design, and think about margin space with the large words.
- watch font weight of the body text.
- nice to have text next to the image, be consistent throughout the entire thing
- Text is long to read. 70 characters max per line.
- Responsive design for mobile, perhaps body text flows to bottom, but keep it next to the image in desktop view.
- Don't need secondary box line. Don't need to be boxes behind it.
- small row of images in gallery (doesn't need to be interactive, good to provide context).
- Labels aren't necessary for the gallery but could be nice. Small caption. Grid. 3X3
